About

Crude blending is an economically feasible option to feed the crude units with uniform feed quality as crude sources and quality has changed over the years, and no one source can supply the same crude quality.

Part-I of this two parts webinars on crude blending discusses the concept and economics of blending different types of crude by using a crude blending optimizer.

Part-II of the webinars series on crude blending will discuss the control system, crude quality analyzers and system implementation.

Speaker

The speaker, Dr. Suresh S. Agrawal, is the founder and CEO of Offsite Management Systems LLC (OMS) and the academy director of OMS eLearning Academy.

He graduated from the Indian Institute of Technology, Mumbai, India, with a Bachelor of Chemical Engineering. He then obtained a Master's and PH.D. Degrees in Chemical Engineering from Illinois Institute of Technology, Chicago, USA.

Dr. Agrawal has 40+ years of experience in senior technical / management positions with international companies and has successfully managed many advanced refinery process control projects in numerous countries. Dr. Agrawal is a registered professional engineer in Illinois, USA, and is a member of the American Institute of Chemical Engineers and Instrumentation Society of America. He has published and presented 30+ papers in international publications and conferences in advanced process control. He has also acted as a consultant to several refining and process industries worldwide and delivers training seminars in the areas of his expertise.

What will you Learn

- Types of crude classifications
- Crude Supply resources and reserves qualities for blending
- Crude price benchmarks
- Various modes of crude Blending
- Crude Blending Optimizer

Who should attend this Webinar

- Blending engineers
- Process Control engineers
- Operations Managers
- Refinery Planners

About OMS eLearning Academy

- Provides a portal for the continuing education of refinery and related business professionals
- Professionals can make their curriculum from 200+ topics or enroll in 200+ structured courses
- Progressive eLearning mode course can be taken anytime, anywhere, and on any device
- Issues course completion certificate and transcript with Continuing Education (CE) credits
- Offers Flexible plans and subscriptions for both individual and enterprises
